

The corrugated steel sheet S18 Sinus is used for the construction and renovation of civil, industrial and agricultural buildings, both for the roof and interior and exterior walls.

It is the ideal solution for short term delivery buildings, low-budget and superior aesthetic requirements buildings.

PRODUCTION SPECIFICATIONS:

- BILKA S18 Sinus corrugated steel sheet is made with a nominal thickness between 0.4 – 0,7 mm, based on the construction requirements.
- The standard length of the modules ranges from 0.500 m to 13.5 m. Execution of the modules with different lengths from the standard ones will be made after prior consultation with the technical specialist from BILKA.
- 31 color options available, matt, glossy, GrandeMat and wood

TECHNICAL CHARACTERISTICS	Material	Steel galvanized sheet metal on both sides protected with polyester
	Nominal thickness	0,4 mm - 0,7 mm
	Total width	1100 mm
	Covering useful width	1050 mm
	Height of the corrugation	18 mm
	Weight on the surface	3 - 7 kg / sqm
	Warranty for glossy finishing	10-year warranty for color characteristics and corrosion
	Warranty for matte finishing	15-year warranty for color characteristics and corrosion
	Warranty for Wood finishing	15-year warranty for color characteristics and corrosion
	Warranty for GrandeMat finishing	30-year warranty for color characteristics and corrosion
Useful life	60 years, resistance to temperature variations
